The following definition is added to Section 60.4102 Definitions:

Utility – a unit or a group of units located in South Carolina that are owned by a common entity and produce electricity for sale. If the unit is owned by two or more utilities, the Hg designated representative or the alternate Hg designated representative shall specify the primary utility for the unit. The primary utility will be the recipient of any Hg allowances allocated for this unit.

The remainder of Section 60.4102 remains unchanged.

Regulation 61-62.60, subpart HHHH, sections 60.4140 through 60.4142, shall be added as follows:

Hg Allowance Allocations

Section 60.4140 South Carolina Trading Budget.

(a) The South Carolina trading budget for annual allocations of Hg allowances for 2010 through 2017 is 0.580 tons (18,560 ounces) per control period. The South Carolina trading budget for 2018 and thereafter is 0.229 tons (7,328 ounces) per control period.

(b) The Department will allocate Hg allowances to affected Hg budget sources according to 60.4142.

(c)(1) The Department will distribute allowances to the affected Hg budget sources as provided in Section 60.4142 equal to 75 percent of the Hg budget source's allocations for each control period in 2010-2017. The Department will distribute allowances to the affected Hg budget sources as provided in Section 60.4142 equal to 100 percent of the Hg budget source's allocations for each control period in 2018 and thereafter.

(2) The Department will establish a Public Health Set-aside account for each affected utility in the State for the 2010-2017 control periods. The Department will allocate allowances to the utility's Public Health Set-aside accounts equal to 25 percent of the utility's allocations for each control period in 2010-2017 as provided in section 60.4142. The allowances will be held in each utility's individual Public Health Set-aside account.

(3) On or before January 31 following the control periods 2010 through 2023, the total amount of a utility's Hg emissions, in ounces, for each Hg budget source subject to the requirements of this rule must be submitted to the Department for that control period by the utility. A utility that has a balance of zero allowances in its Public Health Set-aside account for 2018 or any year thereafter is not required to submit this report to the Department.

(4) For each control period in 2010 through 2023, the Department will transfer Hg allowances from a utility's Public Health Set-aside account to cover emissions that exceed its allocations for that control period, if necessary, based upon the Hg emissions reported according to paragraph (3) of this section. To be eligible to receive allowances from its Public Health Set-aside account, the utility must follow good operating practices and properly operate any air pollution control equipment whose primary or secondary function reduces mercury emissions.

(i) Before midnight of February 15, if it is a business day, or, if February 15 is not a business day, midnight of the first business day thereafter immediately following each control period in 2010 through 2023, the Department will transfer Hg allowances from the utility's Public Health Set-aside account to the affected utility's Hg budget source account as prescribed in section 61-60.4140(c)(4) above.

(ii) For each control period in 2010 through 2017, a utility is eligible to receive allowances from its Public Health Set-aside account, up to but not exceeding the number of allowances put in its Public Health Set-aside account during the same control period, less any allowances sold as per paragraph (6) of this section. Unused Public Health Set-aside allowances will be banked in the utility's Public Health Set-aside account.

(iii) For each control period in the years 2018 through 2023, any unused allowances in a utility's Public Health Set-aside account will be made available for use by the utility. To be eligible to receive allowances from its Public Health Set-aside account during the control periods in 2018 through 2023, the utility's Hg emissions must be greater than the allowances allocated to it for the specific control period in which its emissions exceeded its allocations, based upon the Hg emissions reported according to paragraph (3) of this section.

(iv) If the utility revises and resubmits its report of emissions, as required in paragraph (3) above, to the Department and to the EPA after allowances have been transferred to its affected Hg budget source account from its Public Health Set-aside account and reports fewer emissions, and the EPA has not reconciled the account, any excess allowances must be returned to the State for transfer back into the utility's Public Health Set-aside account within fifteen (15) days of the submission of the revised report of

emissions or within ten (10) days after the date of reconciliation.

(5) In 2024, any allowances remaining in any Public Health Set-aside account will be permanently retired.

(6) The Department will form an advisory committee consisting of but not limited to representatives from the Department, utilities that receive Hg allocations, environmental groups, and academia from South Carolina.

(i) The advisory committee will advise and make recommendations to the Department as to the necessity of a State Hg study, the scope of the study, the projected annual cost and the number of years over which the study will be conducted, and the methodology for determining how the utilities will share the burden of providing allowances from the Public Health Set-aside accounts. Hg allowances from the utilities' Public Health Set-aside accounts may be sold by the Department to fund this study and related studies at any time before the retirement of allowances remaining in the Public Health Set-aside accounts in 2024. Funds from the sale of these Hg allowances will be placed in a restricted account, and the money will be used only to fund studies as determined necessary and relevant by the Department.

(ii) The Department and the advisory committee periodically may review any available data, to include but not limited to the state of Hg control technology, the results of Hg deposition studies conducted within or outside the scope of the study funded by the sale of Hg allowances, and information regarding Hg contamination in surface waters and fish tissue in South Carolina. The Department may issue a report of the findings.

(7) Using the information in this Hg report issued as per (c)(6) of this section, the Department may determine if additional control technology should be required of specific units or facilities. If additional control technologies are required, the Department will impose these requirements through an order, consent decree, permit revision, or revisions to this rule pertaining to the installation and operation of control technology on existing and new coal-fired units. Also, the Department could propose revisions to the Phase II allocations. The order, consent decree, permit revision, or revision to this rule will specify the schedule for installing and operating the required control technology.

Section 60.4141 Timing Requirements for Hg Allowance Allocations.

(a) By November 17, 2006, the Department will submit to the Administrator the Hg allowance allocations, in a format prescribed by the Administrator and in accordance with section 60.4142(a) and (b), for the control periods in 2010, 2011, 2012, and 2013.

(b) By October 31, 2010, and October 31 of each four years thereafter, the Department will submit to the Administrator the Hg allowance allocations, in a format prescribed by the Administrator and in accordance with section 60.4142(a) and (b), for the control periods in the fourth, fifth, sixth, and seventh years after the year of the applicable deadline for submission under this paragraph.

Section 60.4142 Hg Allowance Allocations.

(a) For a Hg allowance allocation under section 60.4141(a) and (b), the Department will allocate Hg allowances to each Hg budget source by summing the amount determined for each of the utility's Hg Budget units.

(b) Each Hg budget unit's baseline heat input will be determined using the single highest amount of the unit's heat input for the control periods that are five, six, seven and eight years before the first year of the period for which the Hg allowance allocation is being calculated, except as provided in paragraph (c) of

this section. Each unit's allocation will be determined by multiplying the total amount of Hg allowances allocated under section 60.4140 by the ratio of the baseline heat input of such Hg Budget unit to the total amount of baseline heat input of all such Hg Budget units in the State and rounding to the nearest whole allowance as appropriate.

(c) A unit's control period heat input for a calendar year under paragraphs (a) and (b) of this section will be determined in accordance with 40 CFR part 75, to the extent the unit was otherwise subject to the requirements of 40 CFR part 75 for the year or will be based on the best available data reported to the permitting authority for the unit, to the extent the unit was not otherwise subject to the requirements of 40 CFR part 75 for the year. Heat input data will be obtained from the Administrator.

(d) Each unit's allocation will be determined by multiplying the total amount of Hg allowances allocated under section 60.4140 by the ratio of the baseline heat input of such Hg budget unit to the total amount of baseline heat input of all such Hg budget units in the State and rounding to the nearest whole allowance as appropriate.
